Deep Realtime Company Dataset for RAG

LTM | Google | Amazon | Apollo Hospitals | Microsoft | Commvault

Generated as of 2026-07-10 11:41 IST. Built as a normal long-form report plus RAG-ready chunks.

Document Purpose

- This document is a normal, readable company knowledge base designed for RAG ingestion.
- The PDF and DOCX are suitable for review; the TXT is best for vector database ingestion.
- Every company section contains source-backed facts, plain-language summaries, timelines, RAG Q&A, and chunk metadata.
- Each source record includes a publisher, date, title, and URL so your RAG system can cite retrieved context.

Dataset Summary

Metric	Value	Use in RAG	Notes
Companies	6	Entity filter	LTM, Google, Amazon, Apollo Hospitals, Microsoft, Commvault
Source records	22	Citation grounding	Official pages and reputable news/search outputs
RAG chunks	239	Vector store ingestion	fact, normal_summary, qa, company_profile
TXT delimiter	---CHUNK---	Chunk parser	Use for LangChain/LlamaIndex loaders
As-of date	2026-07-10 11:41 IST	Freshness metadata	Attach to system prompt or metadata

Recommended Metadata Schema

- chunk_id: unique chunk identifier
- company: entity name
- type: fact / normal_summary / qa / company_profile
- source_id: stable source identifier
- date: source date or dataset as-of date
- title: source document or article title
- publisher: source publisher
- url: source URL or enterprise-search-result
- text: chunk content used by retriever

LTM

Profile: LTM is treated in this dataset as LTIMindtree/LTM, with current source material emphasizing Business Creativity, AI-centric services, BlueVerse, enterprise transformation, cyber risk, and annual-report investor information.

Normal Report Notes

Annual Reports and Financial Information | LTM Investors

Source metadata: LTM-WEB-001 | 2026-06-01 | LTM Investors | https://www.ltm.com/investors/annual-reports

Plain summary: LTM Investors lists FY 2026 annual report material, including Interactive Annual Report 2026, AGM Notice dated 1 June 2026, Integrated Annual Report 2025-26 PDF, Subsidiary Annual Report 2025-26, Annual Return Form MGT-7 FY2025-26, ESOP Disclosure FY2025-26, and CSR capital assets list FY2025-26. The LTM annual reports page presents annual reports, financial statements, investor updates, and corporate performance insights in one place.

Key facts

- LTM Investors lists FY 2026 annual report material, including Interactive Annual Report 2026, AGM Notice dated 1 June 2026, Integrated Annual Report 2025-26 PDF, Subsidiary Annual Report 2025-26, Annual Return Form MGT-7 FY2025-26, ESOP Disclosure FY2025-26, and CSR capital assets list FY2025-26.
- The LTM annual reports page presents annual reports, financial statements, investor updates, and corporate performance insights in one place.

RAG-friendly paragraph

When a user asks about LTM, retrieve this source if the query mentions LTM, AI, 2026 updates, strategy, investment, cyber resilience, digital transformation, healthcare, cloud, agents, models, recognition, or infrastructure. The source-backed context is: LTM Investors lists FY 2026 annual report material, including Interactive Annual Report 2026, AGM Notice dated 1 June 2026, Integrated Annual Report 2025-26 PDF, Subsidiary Annual Report 2025-26, Annual Return Form MGT-7 FY2025-26, ESOP Disclosure FY2025-26, and CSR capital assets list FY2025-26. The LTM annual reports page presents annual reports, financial statements, investor updates, and corporate performance insights in one place.

Useful retrieval questions

1. What are the latest 2026 updates for LTM?
2. What AI-related facts are available for LTM?
3. Which source should be cited for LTM?
4. What numbers or dates appear in the LTM source?
5. What can a chatbot safely answer about LTM from this source?

Annual Report 2026 - LTM

Source metadata: LTM-WEB-002 | 2026 | LTM | https://www.ltm.com/annual-report-2026

Plain summary: LTM annual report content uses the theme "It is time to Outcreate" and says the company brings human insights and intelligent systems together. The annual report page describes LTM technology and domain expertise as converging to create new ways of working, productivity paradigms, and roads to value. The annual report page describes an agentic AI ecosystem for the enterprise of the future and AI-powered digital agents that blend AI efficiency with human-guided intelligence. The page lists May 2026 updates including an offer to acquire Randstad Tech & Consulting Services business in Europe and Australia, and a partnership with Uniphore to scale domain-specific AI. The page lists February 2026 content about the new brand identity and positioning as LTM, the Business Creativity Partner. The page lists November 2025 content about strengthening relationship with Microsoft to drive AI-powered transformation. The page includes case-study style outcome numbers, including 30% faster releases, 40% shorter test cycles, 3x device coverage, and 50% infrastructure savings for a streaming experience example. The page includes an omnichannel commerce example with conversions growing by 30-40% and engagement reaching 8.5M weekly. The page includes an instant payments example where processing speed was boosted by 91% and capacity scaled from 20 to 500 transactions per second.

Key facts

- LTM annual report content uses the theme "It is time to Outcreate" and says the company brings human insights and intelligent systems together.
- The annual report page describes LTM technology and domain expertise as converging to create new ways of working, productivity paradigms, and roads to value.

Google I/O 2026: News and announcements

Source metadata: GOO-WEB-001 | 2026-05-19 | Google The Keyword | https://blog.google/innovation-and-ai/technology/developers-tools/google-io-2026-collection/

Plain summary: At Google I/O 2026, Google said it was making AI more helpful for everyone. Google announced Gemini Omni and Gemini 3.5. Gemini Omni is described as being able to create anything from any input, starting with video. Gemini Omni is described as a leap forward in world understanding, multimodality, and editing. Gemini 3.5 Flash is described as the first model in the latest Gemini family combining frontier intelligence with action. Google described advancements to Google Antigravity as moving from AI tools that help write to agents that help act. Google described agentic experiences across Search, Gemini Spark, Daily Brief in the Gemini app, and Universal Cart. Google said it is continuing to scale Gemini across products from Google Pics to intelligent eyewear to Ask YouTube. Google Workspace updates included new voice capabilities in Gmail, Docs, and Keep, a new design tool called Google Pics, and updates to AI Inbox. Google mentioned expanding digital watermarking with SynthID and C2PA Content Credentials to help identify AI-generated media.

Digital Transformation and AI for Better Care

Source metadata: APL-WEB-002 | 2026 | Apollo Hospitals | https://www.apollohospitals.com/digital-transformation-and-ai-better-care

Plain summary: Apollo said it is advancing digital transformation across clinical, operational, and enterprise functions. Apollo said it is developing clinical AI solutions based on several decades of clinical data. Apollo said the solutions include risk scoring models that reduce hospitalisations, AI-driven decision support systems in critical care, and predictive tools that personalise treatment. Apollo said it created 12 advanced AI algorithms that predict risk for chronic conditions such as CKD, COPD, and liver fibrosis. Apollo said those models are integrated into health check programmes and have validated over 1.7 million patient records. Apollo said its AI tools meet ISO 13485, MDSAP, and GS1 standards. Apollo described a Doctors App that brings real-time critical information to clinicians. Apollo said three hospitals were certified at NABH Digital Accreditation Platinum level. Apollo said it completed full cloud migration of hospital operating platforms onto Microsoft Azure. Apollo said it upgraded Electronic Medical Records systems by improving usability, embedding AI-driven disease risk scoring, and enabling automated clinical summaries via Generative AI.

Microsoft Frontier Company: AI engineering that amplifies and protects your intelligence

Source metadata: MSF-WEB-002 | 2026-07-02 | Microsoft Official Blog | https://blogs.microsoft.com/blog/2026/07/02/microsoft-frontier-company-ai-engineering-that-amplifies-and-protects-your-intelligence/

Plain summary: Microsoft introduced Microsoft Frontier Company as a new operating business focused on Frontier Transformation through AI for customers around the world. Microsoft said the organization provides deep industry knowledge, change management and continuous improvement experience, and enterprise-grade AI engineering expertise. Microsoft described Microsoft Frontier Company as going beyond forward deployed engineering and as an outcome-driven engineering organization. Microsoft announced a 2.5 billion dollar investment in Microsoft Frontier Company. Microsoft said it would embed 6,000 industry and engineering experts at customers to co-design, co-innovate, deploy, and continuously improve AI systems at scale. Microsoft emphasized Intelligence plus Trust as two important components of AI solutions. Microsoft said companies need an intelligence platform so proprietary data, expertise, workflows, and decision-making processes compound over time from within. Microsoft said companies need a trusted platform to observe, govern, manage, and secure AI solutions across every layer of the technology stack. Microsoft said customer data, IP, and competitive advantage are protected and not used to train models in ways that commoditize what differentiates them. Microsoft said customers should not be locked into a single model and mentioned flexibility across OpenAI, Anthropic, Microsoft AI, open source, and specialized industry models. Microsoft said Rodrigo Kede Lima would be President of Microsoft Frontier Company.

C0199 | Microsoft | company_profile | MULTI | Microsoft combined RAG profile

Microsoft combined profile: Microsoft source material in this dataset focuses on Microsoft Frontier Company, enterprise AI engineering, customer intelligence protection, agentic AI, Microsoft Build 2026, Windows development, and Microsoft AI models. Key source-backed facts: The Official Microsoft Blog featured The latest in our company transformation on July 6, 2026. The blog featured Microsoft Frontier Company: AI engineering that amplifies and protects your intelligence on July 2, 2026. The blog featured Inside Microsoft two-decade push to cut water intensity while scaling for growth on June 24, 2026. The blog featured Rethinking cloud operations with agentic observability on June 23, 2026. The blog featured Powering the next wave of AI: Expanding capacity with our new datacenter in Pecos on June 22, 2026. The blog featured Achieving success with AI on June 16, 2026. The blog listed Microsoft Build 2026: Be yourself at work on June 2, 2026. Microsoft introduced Microsoft Frontier Company as a new operating business focused on Frontier Transformation through AI for customers around the world. Microsoft said the organization provides deep industry knowledge, change management and continuous improvement experience, and enterprise-grade AI engineering expertise. Microsoft described Microsoft Frontier Company as going beyond forward deployed engineering and as an outcome-driven engineering organization. Microsoft announced a 2.5 billion dollar investment in Microsoft Frontier Company. Microsoft said it would embed 6,000 industry and engineering experts at customers to co-design, co-innovate, deploy, and continuously improve AI systems at scale. Microsoft emphasized Intelligence plus Trust as two important components of AI solutions. Microsoft said companies need an intelligence platform so proprietary data, expertise, workflows, and decision-making processes compound over time from within. Microsoft said companies need a trusted platform to observe, govern, manage, and secure AI solutions across every layer of the technology stack. Microsoft said customer data, IP, and competitive advantage are protected and not used to train models in ways that commoditize what differentiates them. Microsoft said customers should not be locked into a single model and mentioned flexibility across OpenAI, Anthropic, Microsoft AI, open source, and specialized industry models. Microsoft said Rodrigo Kede Lima would be President of Microsoft Frontier Comp

C0200 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed that it was named among TIME America Best Companies 2026 on July 9, 2026.

C0201 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed a July 7, 2026 release for First Quarter Fiscal Year 2027 earnings release date.

C0202 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed Minutes to Recovery, a hands-on simulation for Frontier AI driven attacks, defense, and recovery readiness, on July 7, 2026.

C0203 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed being ranked number one in five of six use cases in the 2026 Gartner Critical Capabilities for Backup and Data Protection Platforms report on July 6, 2026.

C0204 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed the appointment of Brian Lanigan as Chief Partner Officer on July 6, 2026.

C0205 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed being named a Leader for the 15th consecutive time in the Gartner Magic Quadrant for Backup and Data Protection Platforms on June 30, 2026.

C0206 | Commvault | fact | CVLT-WEB-001 | News Releases - Commvault

Commvault listed a multi-year strategic partnership with Microsoft on June 24, 2026.
